PROJECTS

BAZAR – Chalet Booking & Rewards Mobile Application
Flutter Developer | BLoC Architecture | REST API Integration
Worked on BAZAR, a chalet booking and rewards mobile application developed using Flutter. Implemented BLoC state management and integrated RESTful APIs for chalet listings, bookings, user profiles, loyalty rewards, notifications, and secure payment workflows, ensuring a smooth, scalable, and user-friendly experience.

REC Support – Sports & Events Management Application
Flutter Developer | Provider State Management | API Integration
Worked on REC Support, a sports and events support application developed using Flutter. Built features for event-related support and provider-based user flows, using **Provider state management** and **REST API integration** to ensure smooth data handling, clean UI interactions, and reliable performance across the app.

HIITS Plus – Fitness & Training Mobile Application

Flutter Developer | GetX | API Integration | Performance Optimization

- Worked on HIITS Plus, a fitness and training mobile application developed using Flutter and GetX. Contributed to feature development, UI/UX improvements, and REST API integration to manage workout programs, timers, user interactions, and app performance, ensuring a smooth and engaging fitness experience for users.

Essaly – Digital Receipts & Loyalty Mobile Application

Flutter Developer | BLoC | API Integration | Performance Optimization

Worked on Essaly, a digital receipts and loyalty mobile application developed using Flutter and BLoC. Contributed to feature development, UI/UX enhancements, REST API integration, and performance optimization to support receipt management, loyalty points tracking, and merchant-consumer workflows, ensuring a smooth and engaging user experience.

KEY ACHIEVEMENTS

Essaly – Digital Receipts & Loyalty Mobile Application

Flutter Developer | BLoC | API Integration | Performance Optimization

Worked on Essaly, a digital receipts and loyalty mobile application developed using Flutter and BLoC. Contributed to feature development, UI/UX enhancements, REST API integration, and performance optimization to support receipt management, loyalty points tracking, and merchant-consumer workflows, ensuring a smooth and engaging user experience.

Key Achievements:

- Implemented **BLoC-based state management** for robust and maintainable code.
- Integrated **REST APIs** for seamless receipt and loyalty points tracking.
- Optimized app performance, reducing load times and improving smooth navigation.
- Enhanced **UI/UX**, simplifying workflows for consumers and merchants.
- Delivered **bug-free updates** with zero downtime.
